- Practical, usable verbal strategies for raising responsible children.
- Skills to reduce family conflict and build family solidarity.
- Strategies to encourage autonomy and mutual respect.

Mission Statement

It is our intention to strengthen families and improve parent communication skills by helping parents learn practical, useable verbal strategies for raising responsible, caring, confident children.

The Parent Talk System

The Parent Talk System is a style of communicating with children that creates emotionally healthy family relationships. It is a skill-based program that teaches parents a series of verbal skills and language patterns to help them achieve their desired objective of raising responsible, respectful children while reducing stress, strain, and family conflict.

There is an undeniable link between the words parents speak and the attitudes and outcomes that children create in their lives. Your choice of words, and your communication style, are critical to the self-esteem, emotional health, and personal empowerment of your children. By intentionally selecting words and language patterns that build autonomy and responsibility, you can empower your children and enhance their effectiveness as capable, caring human beings.

- Learn how to speak in words that nurture, uplift, and inspire.
- Learn how to hold children accountable for their actions without attacking their spirit or personality.
- Learn how to set appropriate limits and make controlled choice work for you.
- Learn to praise in ways that help children develop a strong internal sense of self-esteem.
- Learn language that promotes independence while reducing learned helplessness.
- Add to your tool box of parenting skills so that you and your child can become more Response-Able.
